

I will interact and use several portals and document my findings and experience (mainly searching experience)

## Edx.org

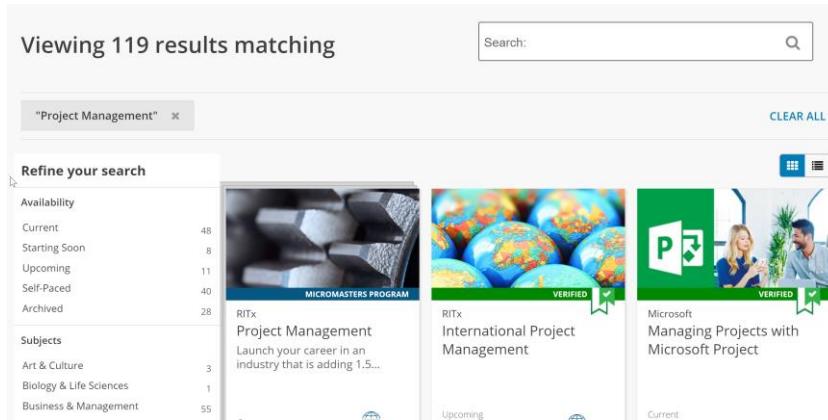

Searching experience :

By typed search: Gives a snippet of suggestions , course and programs. Shows provider on the side in grey (GOOD FEATURE)

The screenshot shows the Edx.org search results for 'Project Management'. At the top, there is a search bar with the text 'Search: Project Management' and a magnifying glass icon. Below the search bar, the results are categorized into 'Courses' and 'Programs'. Under 'Courses', there are three entries: 'Evidence-Based Project Management' by ANUx, 'Managing Projects with Microsoft Project' by Microsoft, and 'Strategic Applications of IT Project & Program Management' by UWashingtonX. Under 'Programs', there are two entries: 'Project Management' by RITx and 'IT Project Management' by UWashingtonX. At the bottom of the list, there is a link 'SEE ALL RESULTS'.

Then gives you all of the results when clicked “See all results” , allows for refinement, shows most popular and best matches

The screenshot shows the Edx.org search results page for 'Project Management'. At the top, it says 'Viewing 119 results matching "Project Management"'. There is a search bar with a magnifying glass icon and a 'CLEAR ALL' button. Below the search bar, there is a 'Refine your search' section. Under 'Availability', there are filters for 'Current' (48), 'Starting Soon' (8), 'Upcoming' (11), 'Self-Paced' (40), and 'Archived' (28). Under 'Subjects', there are filters for 'Art & Culture' (3), 'Biology & Life Sciences' (1), and 'Business & Management' (55). To the right, there are three course cards: 'MICROMASTERS PROGRAM' by RITx (Project Management, Launch your career in an industry that is adding 1.5...), 'International Project Management' by RITx (Upcoming), and 'Managing Projects with Microsoft Project' by Microsoft (Current). Each card has a 'VERIFIED' badge.

Update Results

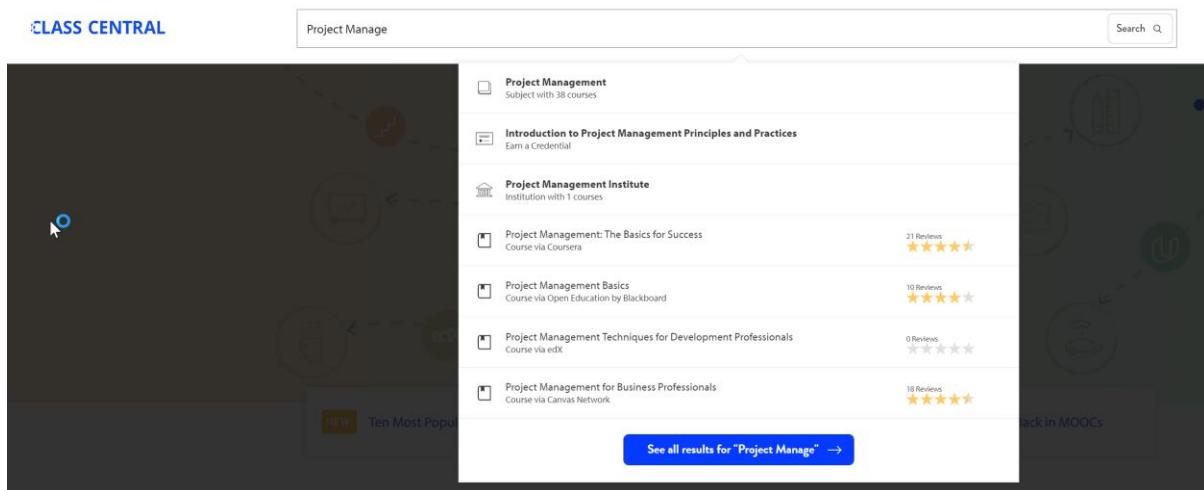

Allows refinement early on, immersive, focuses the page on this.

**Overall Thoughts:** Quick, easy clean, filters and refinement not the best, not a lot of info provided before clicking on the course to examine, however when done so gives a lot of information

## Class-central.com

Searching experience:

Type searching: Focuses attention on your search. Immersive. Shows how many courses there are on that subject, shows a popular programme, shows institution, then shows courses, and the provider e.g (Coursera, edX, Canvas Network) **NOTABLE FEATURE. Can use this in our web app as we will be pulling courses from various APIs**

The screenshot shows the Class-central.com search interface. At the top, there is a search bar with the placeholder "Search" and a magnifying glass icon. Below the search bar, the text "Project Manage" is displayed. The main content area shows a list of course results:

- Project Management**  
Subject with 38 courses
- Introduction to Project Management Principles and Practices**  
Earn a Credential
- Project Management Institute**  
Institution with 1 courses
- Project Management: The Basics for Success**  
Course via Coursera
- Project Management Basics**  
Course via Open Education by Blackboard
- Project Management Techniques for Development Professionals**  
Course via edX
- Project Management for Business Professionals**  
Course via Canvas Network

Each course entry includes a small icon, the course name, the provider, and a star rating and review count. At the bottom of the list, there is a blue button labeled "See all results for 'Project Manage' →".

After clicking on see all results : Can refine search. **NOTABLE FEATURE: "By Start Date". NOTABLE FEATURE: Star Rating and reviews on each result. NOTABLE FEATURE: sort by start date and rating. NOTABLE FEATURE: Shows if you can earn credentials.** Clean Design easy to use, quick, gives a lot of relevant info.

**Overall thoughts:** This portal was ok to use. The typed searching was not good as it did not give any suggestions while typing and does not give you any direction. However the filtering and refining the search when browsing is very good with plenty of categories to choose from to sort your search and help you find your desired result.

## Ofcourse.co.uk

Searching experience:

Type searching : When you begin typing the portal starts to throw out suggested courses for you to study. These cards include a brief break down of then course , price and how many students are currently enrolled < **NOTABLE FEATURE**. It does not however give you search suggestions and instead takes a while to load. This is not very convenient.

The screenshot shows a search results page for 'Project Mana'. At the top, there is a search bar with the text 'Project Mana'. Below the search bar are four filter buttons: 'Expert Teachers' (with a pencil icon), 'Learn on any Device' (with a computer monitor icon), 'On Demand' (with a play button icon), and 'Global Community' (with a location pin icon). The main search results area is titled 'Search Results' with a magnifying glass icon. It features a course card for 'Practical Project Management'. The card includes a thumbnail image of four people in a meeting, the course title 'Practical Project Management', a description: 'This project management course will give you a strong understanding of the project process & how to get the best out of yourself and those you are working with to deliver your project successfully and on time.', the price '£79.00', a 'View Course' button, and a student count '60 students' with a person icon.

After clicking on the course:

## Practical Project Management

This project management course will give you a strong understanding of the project process & how to get the best out of yourself and those you are working with to deliver your project successfully and on time.

After clicking one of the topics, you are brought to a page with some suggested courses under the topic. The results are displayed similar to how they are displayed after type searching. On the left you get a tab with sub categories which you can navigate to, to refine your search.

**Overall Thoughts :** The website is easy to navigate through while searching, it is pretty straight forward. However the typed searching is fairly slow and doesn't give you suggestions as you type which is really inconvenient .

**Some Conclusions :** After researching several popular portals I have derived several conclusions about MOOC searching. Most portals achieve the same goal (Searching functionality) in different ways. A lot of the differences and contrasts are shown in the above portals that I have decided to write up small reports on. Other portals that I also researched that I haven't included where all very similar in ways that where good and bad. The one thing that surprised me was the lack of filters and searching functionality implemented. From such big portals and MOOC search engines I expected a lot more. Considering the requirements Herr Sonne layed out for us. We have to adhere to high standards.

Filter: Cost

Popular top 20

Language

Cluster/Topics

Actuality/Duration - Very recent, how long  
Certificate, or not - (By who? etc)

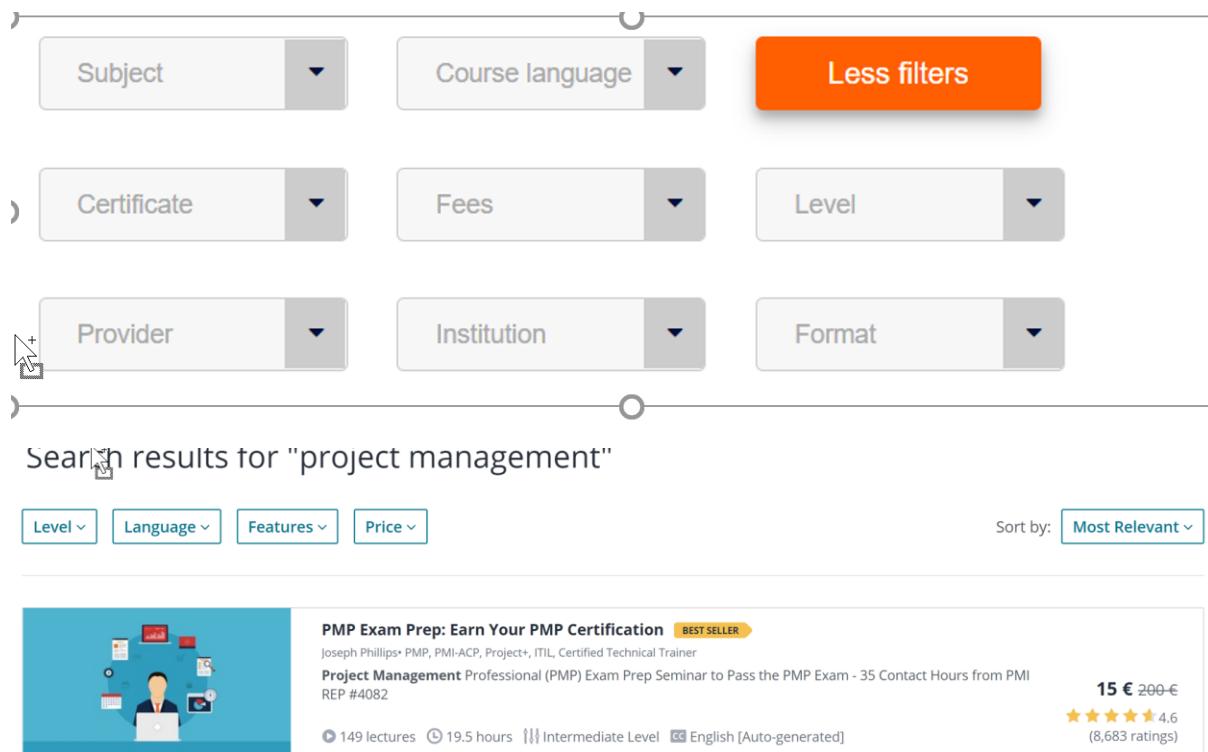

Follower - how many people are using this?, specifically Lufth employees  
Feedback, Judgement via LHG User  
Number of people within LHG

Leadership level (from jun to sen Manager)

Licence Policy for Enterprise Usage (Licence policy)

The amount of filtering he requires from this portal we are designing seems to be more than what I have seen out there on the market currently even from the biggest providers such as Udemy and Class Central.

However the implementation of these features is necessary as I have found that websites that lack refinement in searching severely impact on searching performance of the user . The most convenient ways that I have found to implement filtering. Would be some kind of minimal tab interface Such as seen on Edukatio and Udemy

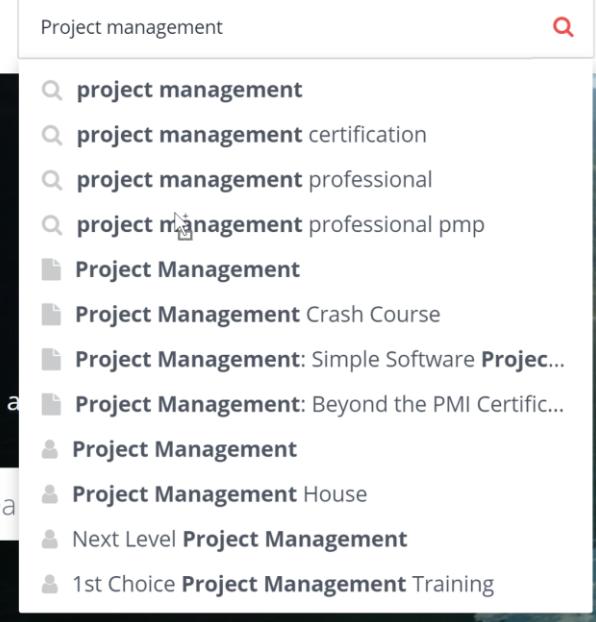

The screenshot shows the Udemy search interface. At the top, there are several filtering dropdowns: 'Subject', 'Course language', 'Less filters' (in orange), 'Certificate', 'Fees', 'Level', 'Provider' (with a plus icon), 'Institution', and 'Format'. Below these is a search bar with the text 'Search results for "project management"'. Under the search bar are additional filtering buttons for 'Level', 'Language', 'Features', and 'Price'. To the right, there is a 'Sort by' dropdown set to 'Most Relevant'. The main area displays a course card for 'PMP Exam Prep: Earn Your PMP Certification' by Joseph Phillips. The card includes a thumbnail of a person at a desk, the course title, a 'BEST SELLER' badge, a description, the price '15 € 200 €', a rating of '4.6' from '8,683 ratings', and details about 149 lectures, 19.5 hours, and intermediate level English content.

Both of these filtering implementations are clear and plentiful. And where the best examples of filtering that I have seen from browsing many of the portals that I have found and also many of the ones that Herr Sonne provided for us. These implementations were very fast and easy to figure out. My method of testing for this research was viewing the portals from the users point of view and searching for a desired course and topic on each portal.

Proposal : implement different types of filtering techniques in design before bringing prototypes to user tests in Lufthansa offices.

Searching by typing : I was very surprised by the lack of searching suggestions some of the portals had. The features and functionality were not very impressive. The two best ones that I have come across were Udemy and Class Central. They implemented the type searching suggestions different from one another. (First Udemy)

Project Management: The Basics for Success Course via Coursera 21 Reviews ★★★★★

Project Management Basics Course via Open Education by Blackboard 10 Reviews ★★★★★

Project Management Techniques for Development Professionals Course via edX 0 Reviews ★★★★★

Project Management for Business Professionals Course via Canvas Network 18 Reviews ★★★★★

See all results for "Project Management" →

Both of these help you search in a very quick and satisfying way. Yet they are both different. Class central provides more information and focus away from the main website (which I did and did not like) Would have to be tested on the user.

Proposal : We should implements type searching styles similar to these with several changes in different prototypes for testing on users. These where both the quickest and most convenient ways of type searching for me.

#### After Filtering (Browsing) (How to display search results):

This for me was one of the biggest things that stood out about the searching process. The information or the lack of given by a portal about courses. A lot of portals just give you a small card/tab or line with no further info about the course and you have to click and follow the link to find out more about the course. (This was okay) Until I came across convenient and more sexy implementations of the search results. One that comes to mind is again Udemy

The information here is subtly shown but it is there and very informative and saves the user a lot of time wasting ( clicking on a course to find out some crucial details that will make him decide not to take it and go back to searching). For example here Udemy shows how many lectures are included, how many hours is required to complete the course, the level of skill required, the language, rating, the price, provider, lecturers. This is all shown on one card , very subtle sexy and informative and makes the searching experience excellent.

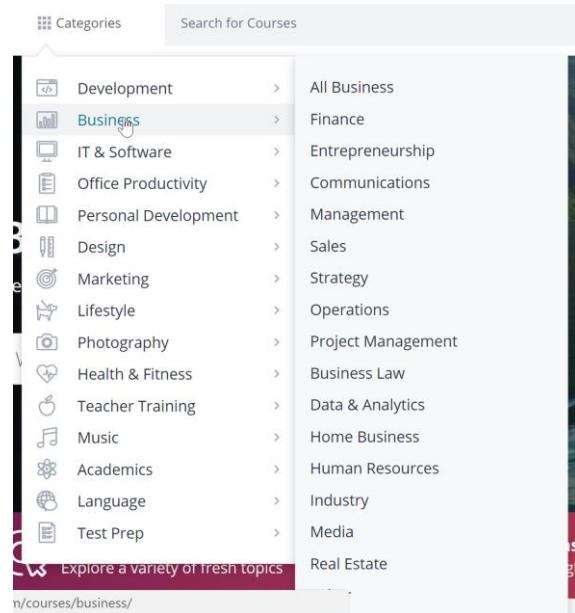

Another this way the information card can be implemented is with a mouse hover pop up that does not waste space on the screen until the user focuses on it with the mouse .

A screenshot of a Udemy course card for 'Conflict Management with Emotional Intelligence'. The card has a light blue header with 'Leadership' and 'Interviewing' tabs. Below the tabs, it says 'Published: 04/2017'. The main title is 'Conflict Management with Emotional Intelligence', followed by a 'BEST SELLER' badge. It says 'in Conflict Management | Human Resources'. It shows '55 lectures' and '2 hours'. The level is 'Intermediate...' and the language is 'English'. Below the card, a description reads: 'Develop your interpersonal skills to manage disagreements, difficult situations and interactions'. A bulleted list of learning objectives follows: 'Understand what conflict is about and how people react to conflict', 'Recognize why some conflict is to be expected and why it is a part of healthy relationships', and 'Have an insight into the various modes that can be used in conflict resolution'. On the left, there is a sidebar for 'Top Courses in "Human' with a 'Conflict Management with Emotional...' course card, which includes a small image of a chessboard with two lightbulbs, the author 'Robin Hills', a rating of '3.9 (45)', and a price of '180-€ 15 €'.

This was by far the best way to display results in my opinion. The other portals implemented results very similar to this except usually without any additional information on the cards. Just a good looking interface without much info.

#### Manual Browsing Navigation :

This was implanted on portals in several ways. Nearly all portals did this in their own way. Some used bread crum nav, some used drop down menus that expand and don't make you leave the page. Both of these implementations work well and allow the user to focus. However I do feel like having a consistant drop down menu with options to start your search is optimal and was for me the quickest way to start searching for something I wanted and did know the specifics for. Of course these features need to implemented in several ways and then tested on the users to get feedback.

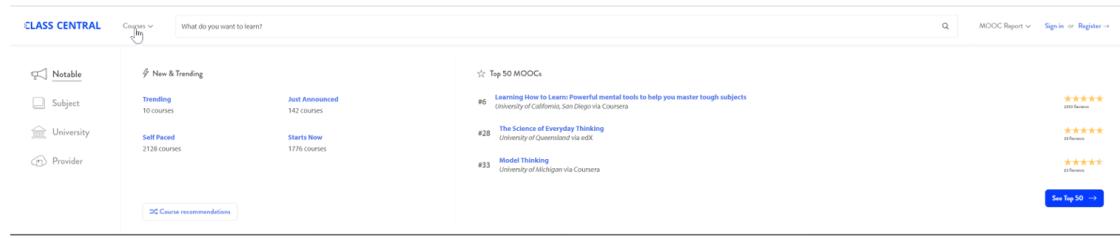

The screenshot shows a navigation menu for a course portal. At the top, there is a 'Categories' section with a list of course categories and a 'Search for Courses' input field. Below this is a list of categories with their sub-topics. The 'Business' category is highlighted with a blue background and a cursor icon. The list includes:

- Development > All Business
- Business** > Finance
- IT & Software > Entrepreneurship
- Office Productivity > Communications
- Personal Development > Management
- Design > Sales
- Marketing > Strategy
- Lifestyle > Operations
- Photography > Project Management
- Health & Fitness > Business Law
- Teacher Training > Data & Analytics
- Music > Home Business
- Academics > Human Resources
- Language > Industry
- Test Prep > Media
- Real Estate

At the bottom of the menu, there is a red banner with the text 'Explore a variety of fresh topics' and a URL 'n/courses/business/'.

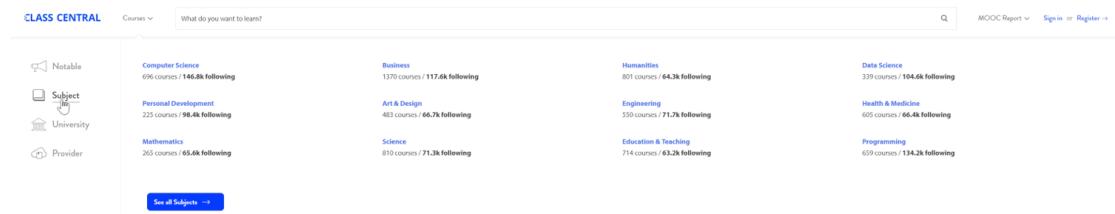

## Browse Searching:

The screenshot shows the Class Central website. At the top, there is a search bar with the placeholder "What do you want to learn?". Below the search bar, there are several filters: "Notable", "Subject" (which is selected and highlighted in blue), "University", and "Provider". To the right of these filters, there are sections for "New & Trending", "Just Announced", and "Top 50 MOOCs". The "Top 50 MOOCs" section lists three courses: "Learning How to Learn: Powerful mental tools to help you master tough subjects" (University of California, San Diego via Coursera), "The Science of Everyday Thinking" (University of Queensland via edX), and "Model Thinking" (University of Michigan via Coursera). Each course entry includes a thumbnail, the course name, the provider, and a star rating. At the bottom right of the main content area, there is a blue button labeled "See Top 50 →".

### NOTABLE FEATURES: New and trending, Top 50 MOOCs.

Also can sort by subject, university, provider

The screenshot shows the Class Central website with the "Subject" filter selected. The main content area displays a grid of subject categories. Each category includes a thumbnail, the subject name, and the number of courses and followers. The categories are: Computer Science (69k courses / 146.8k following), Business (137k courses / 117.4k following), Humanities (801 courses / 64.3k following), Data Science (339 courses / 104.6k following), Personal Development (225 courses / 94.4k following), Art & Design (483 courses / 66.7k following), Engineering (550 courses / 71.7k following), Health & Medicine (605 courses / 66.4k following), Mathematics (265 courses / 65.4k following), Science (810 courses / 71.3k following), Education & Teaching (714 courses / 63.2k following), and Programming (659 courses / 134.2k following). At the bottom right of the main content area, there is a blue button labeled "See all Subjects →".

These drop downs from Udemy and Class central were my favourite examples of how to start browsing for courses. And were definitely the quickest.
